

With apples grown at **almost 1000 metres** above sea-level on the **Ritten in South Tyrol** plus our strict quality criteria, we produce **all-natural** gourmet **mountain apple juices**: both **single-variety** juices and **cuvées** of apple juice with perfect partners or fascinating aroma extracts - and as a very special highlight our limited-edition **Grand Cru** juices made from almost forgotten apple varieties. **Kohl mountain apple juices** are an ideal **thirst-quencher** at any time of day or night and a **fine and elegant alternative** to wine with your meal.

Mountain apple juice & Wild Blueberry

Product line: CUVÉE

Sales description: fruit juice with apple (80%) & wild blueberry (20%)

Juice composition of our ripe, hand-picked mountain apples and wild blueberry.
Guaranteed natural and unadulterated.

Mountain apple juice & wild blueberry: purple-violet, mountain and forest aromas, mild on the palate, slight sweetness

The midnight blue, highly aromatic blueberry juice added to our mountain apple juice creates this characterful, deep purple violet cuvée. The forest notes of the blueberries are perfectly integrated into the sweet aroma structures of the apple juice, resulting in a smooth and velvety mouthfeel with a strong presence.

Serving temperature: 8 - 10°C

Especially recommended with feathered game, grilled meats, hard cheeses, Christmas cookies.

Our recommendation: we recommend the use of stemware for our mountain apple juices so that, as with wine, the aromas can develop fully.

Kohl mountain apple juices are **carefully pasteurised** for long life but contain **no preservatives or added sugar**.

Nor do they contain any animal-derived ingredients or genetically modified products. Kohl mountain apple juices carry the **V-label** of the European Vegetarian Union.

Our mountain apple juices do not contain gluten. They are digestible for people with coeliac disease.

Store unopened bottles in a **cool and dark place**. Once opened, keep in a refrigerator and drink within 6 days.
