

With apples grown at **almost 1000 metres** above sea-level on the **Ritten in South Tyrol** plus our strict quality criteria, we produce **all-natural** gourmet **mountain apple juices**: both **single-variety** juices and **cuvées** of apple juice with perfect partners or fascinating aroma extracts - and as a very special highlight our limited-edition **Grand Cru** juices made from almost forgotten apple varieties. **Kohl mountain apple juices** are an ideal **thirst-quencher** at any time of day or night and a **fine and elegant alternative** to wine with your meal.

Mountain apple juice & Hops

Product line: CUVÉE

Sales description: beverage with apple juice (99,2%) & extract of hops (0,8%)

Juice composition of our ripe, hand-picked mountain apples and hops extract.
Guaranteed natural and unadulterated.

Mountain apple juice & hops: straw yellow, intensive vegetable notes, bitter spiciness, silky finish

Our mountain apple juice with hops is radiant with an intensive straw yellow colour. The tart and spicy aromas of the hops contrast with the sweetness of the apple juice and harmonise the extremes in an elegant blend. A fine acidity remains in a juice that is opulent and luscious on the palate with a lingering aftertaste.

Serving temperature: 8 - 10°C

Especially recommended with spicy or hot grilled dishes, pizza, strong cheeses, desserts made with coffee.

Our recommendation: we recommend the use of stemware for our mountain apple juices so that, as with wine, the aromas can develop fully.

Kohl mountain apple juices are **carefully pasteurised** for long life but contain **no preservatives or added sugar**.

Nor do they contain any animal-derived ingredients or genetically modified products. Kohl mountain apple juices carry the **V-label** of the European Vegetarian Union.

Our mountain apple juices do not contain gluten. They are digestible for people with coeliac disease.

Store unopened bottles in a **cool and dark place**. Once opened, keep in a refrigerator and drink within 6 days.
