

With apples grown at **almost 1000 metres** above sea-level on the **Ritten in South Tyrol** plus our strict quality criteria, we produce **all-natural** gourmet **mountain apple juices**: both **single-variety** juices and **cuvées** of apple juice with perfect partners or fascinating aroma extracts - and as a very special highlight our limited-edition **Grand Cru** juices made from almost forgotten apple varieties. **Kohl mountain apple juices** are an ideal **thirst-quencher** at any time of day or night and a **fine and elegant alternative** to wine with your meal.

Rubinette

Product line: GOURMET

100% pure mountain apple juice from single variety apples - naturally cloudy

Pressed from our ripe hand-picked mountain apples. Guaranteed authentic and natural.

Moutain apple juice: bright straw yellow, multilayered bouquet, intensive and harmonious, long finish

The elegance begins with the colour: a light straw yellow, shimmering with undertones of rosé and apricot. The mountain apple juice made with the Rubinette variety offers an intensive bouquet of aromas including dried fruits, date, quince and apricot spiced with a restrained note of vanilla. Elegant and opulent on the palate, the delights of this juice linger with a lingering aftertaste.

The Apple: Rubinette is a cross between Golden Delicious and Cox Orange. Small to medium in size and yellowish green in colour, usually with some redness on the sunny side, Rubinette has a firm crisp flesh and is very juicy.

Serving temperature: 8 - 10°C

Especially recommended with delicate goat's cheese, light and spicy vegetable and meat dishes.

Our recommendation: we recommend the use of stemware for our mountain apple juices so that, as with wine, the aromas can develop fully.

Kohl mountain apple juices are **carefully pasteurised** for long life but contain **no preservatives or added sugar**.

Nor do they contain any animal-derived ingredients or genetically modified products. Kohl mountain apple juices carry the **V-label** of the European Vegetarian Union.

Our mountain apple juices do not contain gluten. They are digestible for people with coeliac disease.

Store unopened bottles in a **cool and dark place**. Once opened, keep in a refrigerator and drink within 6 days.
